

Flu Clinics 2020

We are now booking for our flu clinics for those patients in the at risk groups (All patients who are over 65 or under 65 and have asthma, diabetes, heart problems, breathing problems, renal disease or a BMI 40 or above or any other chronic illness, or are a carer for an elderly or disabled person or are currently pregnant).

You will need to contact the surgery to make an appointment before attending the specific flu clinic. We will not be able to accommodate walk-in requests for flu jabs.

We would like to reassure our patients that we put your safety first. This is why our clinics will be different than previous years as we are following government guidelines.

- ***One way system into and out of the surgery will be in place.***
- ***Abiding by the 2 meter rule***
- ***Markers will be on the floor for patients to stand and queue and more forward when called. You may be required to queue outside for a short period.***
- ***Patients not to attend earlier than their appointment time to avoid unnecessary long queues and crowding.***
- ***We ask patients not to attend the practice if they or a member of their family has any COVID symptoms such as fever, cough, loss of sense of taste or smell.***
- ***Facing coverings to be worn please***
- ***Please wear short sleeved easy to remove clothing to facilitate easy vaccination.***

Please do not call the practice before 10:00 and please avoid Monday mornings, due to the high volume of phone calls.

Below are the clinic dates available for October 2020. Please note that the clinics are split between the 'At Risk' Group and the 'Over 65' Group. We will only be able to see patients that match the specified

group on that day who have a pre-booked appointment. More flu clinics will be arranged for November and details to be published here in due course.
