

The Severnbank Surgery Patient Group at 16th April 2019

All GPs practices are encouraged to have a "Patient Group". The group should be as representative of the practice population as possible.

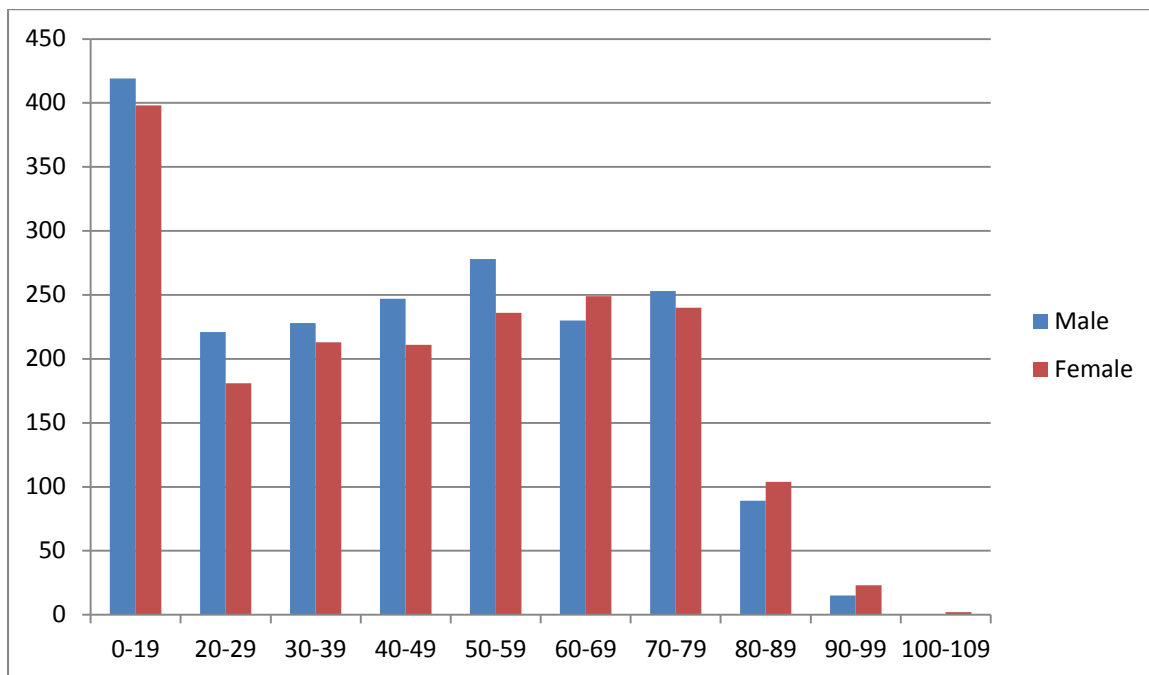

Membership of the group is voluntary. We value our patient group who give up a small amount of their time to meet with us and offer their ideas and opinions to try to ensure that the practice develops services and uses any money donated to the practice appropriately.

We collect feedback from the patient group either face to face or virtually via email, post or by phone.

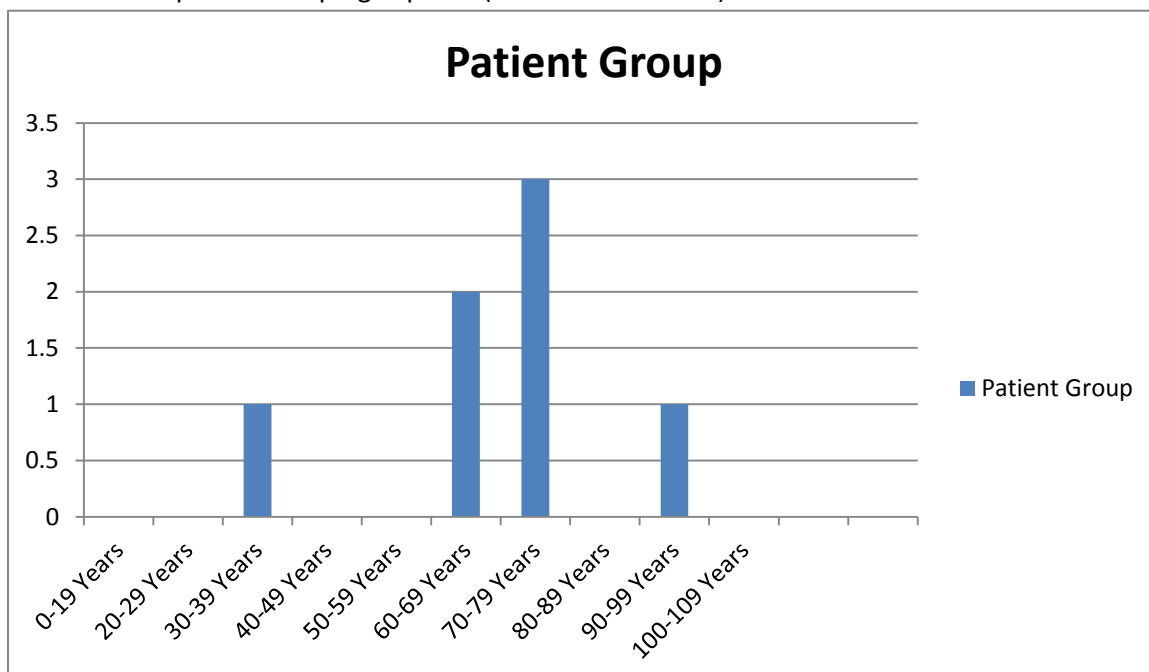

Currently, the patient group is made up as follows

7 members in total (2 male and 5 female)

Patient list at Severnbank Surgery as of 16th April 2019 (3836 patients in total)

Patient Participation Group Age Spread (7 members in total)

Patient Group age spread (21 patients in Group)
